

Minisymposium on HPC Applications in Physical Sciences

The ***Minisymposium*** will be a part of the [11th International Conference on Parallel Processing and Applied Mathematics PPAM 2015](#), organized in Krakow, Poland, on September 6-9, 2015.

This is the second time the ***Minisymposium*** is included in the PPAM Conference, whereas the previous events in the series were independent (International Seminar *Phase Transitions and Critical Phenomena*, Poznań 1997) or organized within the PARA 2008 Workshop on State-of-the-Art in Scientific and Parallel Computing, Trondheim, Norway, 2008 (*HPC Applications: Molecular Nanomagnets Simulations*).

MINISYMPOSIUM TOPICS

Modeling and numerical simulations have become important tools in physical sciences and materials design. Significant results have been achieved in simulations of static and dynamic properties of the condensed and soft matter systems using the HPC resources. The ***Minisymposium*** is devoted, but not limited, to HPC applications in physical sciences and aims at addressing the following topics:

- a) scalability of the simulation tools in the HPC environment;
- b) the overlap between the *ab-initio* and phenomenological modeling;
- c) non-classical dynamics in the low-dimensional magnetism;
- d) new approaches and simulations methods;
- e) new tools and environments in materials science computations.

Scientific success of this ***Minisymposium*** will result not only from an overview of high-performance computing in a variety of systems, but also from recognizing the limitations of the available theoretical tools and from the identification of challenging areas where new efforts will be required to further advance the field.

PAPER SUBMISSION AND PUBLICATION

Abstracts and original papers are invited for the ***Minisymposium***. They should be prepared according to the Springer LNCS and PPAM 2015 rules and be submitted using the online submission system (see <http://ppam.pl/submission>). Submissions will be refereed and accepted on the basis of their scientific merit and relevance to the workshop topics. Only papers presented at PPAM 2015 will be included in the proceedings, to be published after the conference by Springer in the LNCS series.

IMPORTANT DATES:

<i>Submission of Abstracts and Papers:</i>	<i>April 26, 2015</i>	<i>extended till May 11, 2015</i>
<i>Notification of Acceptance:</i>	<i>June 5, 2015</i>	<i>extended till June 20, 2015</i>
<i>Camera-Ready Papers</i>	<i>November 15, 2015</i>	

MINISYMPOSIUM CHAIRS

Grzegorz Kamieniarz (gjk@amu.edu.pl)	A. Mickiewicz University in Poznan, Poland
Wojciech Florek (wojciech.florek@amu.edu.pl)	A. Mickiewicz University in Poznan, Poland

PROGRAM COMMITTEE

Joan Adler, Technion – Israel Institute of Technology, Haifa, Israel
Stefano Carretta, University of Parma, Italy
Philippe Depondt, Universite Pierre et Marie Curie, Paris, France
Marc Drillon, University Luis Pasteur, Strasbourg, France
Andrzej Drzewiński, University of Zielona Góra, Poland
Larry Engelhardt, Francis Marion University, Florence (SC), USA
Jarosław S. Klos, Leibniz Institute of Polymer Research, Dresden, Germany
Leeor Kronik, Weizmann Institute of Science, Israel
Krzysztof Kułakowski, AGH University of Science and Technology, Krakow, Poland
Grzegorz Musiał, A. Mickiewicz University in Poznan, Poland
Federico Totti, University of Florence, Italy
Kalliopi Trohidou, NCSR “Demokritos”, Attiki, Greece
Krzysztof W. Wojciechowski, Institute of Molecular Physics, Poland
Jacek Wojtkiewicz, Warsaw University, Poland
